

Amendments To The Abstract:

In the English translation document, please add the section heading at page 11 line 1, as follows:

--ABSTRACT

The invention relates to a turbine shaft that is aligned in a longitudinal direction. Said shaft comprises a central region and two outer regions, which are fixed to the central region in the longitudinal direction. The central region is produced from a material with a higher heat resistance than the two outer regions.--

A clean copy of the Abstract is provided herewith on a separate sheet.
